

PRODUCT INFORMATION

STAINLESS STEEL POLISHING

If you often have to polish stainless steel, our professional tool set is just the product you need. It comes with a selection of perfectly-matched products for all stages in your work – from grinding to mirror-finish polishing. This specific selection of products will enable you to quickly and simply get the end result you want. Reduced working revolutions mean that all polishing products in the professional tool set must be used on a 125 mm diameter angle polisher.

Clean the workpiece after every polishing stage with a soft damp cloth and a little washing-up liquid. Ensure that pre-polishing paste residues are removed from the workpiece before starting mirror finishing/final polishing work.
